

NCP POURING CAP

COVER TO PROTECT AND IMPROVE THE QUALITY OF THE SELECTIVE COLLECTION

Cod. 02173

cover with anti-odour
removable filter

slot for explanatory
and/or customized
sticker

arrangement for sound
buzzer and/or led light

The NCP cover, made of PP SUITABLE for resisting to ATMOSPHERIC agents, was designed to increase the SAFETY of the user when handling containers for the selective waste collection (namely to increase glass safety) and to facilitate the disposal by improving the different kinds of waste (it is possible to have different colours for different types of waste).

NCP can be mounted (subject to check) on already existing containers with several benefits (for instance: bins for the collection of glass, paper, etc).

It is also equipped with a special BLOCKING DEVICE that prevents the cover from remaining open and with a special casing for a sealing gasket, thus PREVENTING the entrance of rainwater into the container and the overflow on the ground of HAZARDOUS LIQUIDS which could seriously pollute the area (then requiring specific reclamation of the surroundings).

Optional accessories:

- Lock with universal key
- Possible application of electrically and/or electronically controlled locks for opening control
- Colour customization of the cover
